PRICE FIVE CENTS.

## 'BOTH MEXICO AND CENTRAL AMERICA ARE RIPE FOR JAP CONQUEST'

**Frederick Upham Adams Shows Why This Country May Have to Repel Yellow Invader Seeking a New Empire at Its Very Doors.**

**"War or Humiliation Confronts U. S. as Result of Applying the Monroe Doctrine as Threat and Not as Firmly Enforced Policy."**

**"Others Will Take Up Task. We Decline—We Are Responsible for the Lamentable Condition of Affairs To-day in Mexico."**

**FREDERICK UPHAM ADAMS.**

"The time is coming when it will be forced to fight Japan on Japanese soil in North America."

In varying phrase, the startling predictions were repeated by men during a recent protracted tour of Mexico and Central America. It was first uttered, practically as above quoted, by President Franklin D. Roosevelt in his speech to the Senate.

"This warning was repeated to me by a President of a Central American republic who shall remain unnamed, who has been deeply impressed by overthrown by revolution. It was also uttered by an American of high reputation and keen judgment, who has been a student of the situation for more than a generation.

U. S. Diplomacy Stopped.

The ignorance and indifference of the American people concerning Mexico and Central America are associated with the ignorance and stupidity which has marked our diplomatic intercourse with them, constituting a menace of dire portent.

The Danger Zone.

As a result of the diplomatic imbroglio we have made of this great section a danger zone. We have created at our very doors conditions which present with any of the other unenlightened nations no count as friends, or the alternative of abandoning a Monroe Doctrine.

We are responsible for the lamentable condition of affairs to-day in Mexico and Central America, and will be responsible for the conditions of military despotism and recurrent revolutions which afflict Central America.

These statements will not take up the task which we decline. That will mean war or humiliation.

Let us consider the interest of Japan in Central America.

It is a reasonable certainty that Japan has not spread her cards on the table, but the pending conflict over the Canal will bring her into the picture. It may be assumed that Japan has no immediate expectation that its people will be persecuted under the new conditions of the proposed legislation. The Japanese will add the rights of naturalization. Japan knows that it is not within the power of our National Congress to control or change the alien land laws of any country.

The wise eyes of Japan know all this, and more, but they have some concrete moves in demand some time before the new legislation is granted. What Japan desires and will fight for is an outlet for her surplus population.

Formerly, Japan wrested from China and tried to win from Russia the bleak plains of Manchuria; but there is nothing that Japan could want on the Asiatic coast to serve her purpose.

Her eyes are turned to the east. They are fixed on California or any part or portion of the United States, but not on Mexico. Japan's desire of America, the neglected and semi-negligible wards of our Monroe Doctrine.

For 30 years the Japanese have

## PHONE RAVINGS JUST A DISEASE DOCTORS FIND

Dementia Telephonica, Recently Discovered Malady, Is Superior to "Line Is Busy."

ATLANTANS ARE AFFLICTED

Operators at Ivy Exchange Declare That They Have Known of It for Years.

Golfers Go 35 Miles In Just 1,087 Strokes

Expands From Maldestone to Littleton on the 8th on a Wager.

Social Cable to The American.

LONDON, July 26.—To cover 35 miles in 1,087 strokes is a feat that two golfers accomplished in playing from Maldestone to Littleton-on-Tees.

This came about when a golfer offered to bet Neville Foster, of the Maldestone Golf Club, and Paul Arden, of the Newton Green Golf Club, that they could not play from Forest Row to Crowborough over the woodland heath and hills, with a score of less than 1,000 strokes. The bet was taken and the task accomplished in 1,084 strokes.

Waiters Back of Bill To Prevent Tipping

Measures Provides Fine for Both Tipper and Recipient of Bounty, and Reward for Informer.

ST. LOUIS, July 26.—An ordinance to end "tipping" has been passed by the City Council and will go before the House of Delegates, where it is expected it will be speedily adopted, and, with the signature of the Mayor, become a law.

The ordinance has had the backing of the union waiters of St. Louis, who are now striking in the principal hotels and restaurants.

The fine will range from \$1 to \$5 for each offense, both the "tipper" and recipient of the "tip," being subject to fine, and the informer to receive half of the fine.

Shrinks Three Inches During Long Illness

Patient Hurt in Auto Accident Loses in Height Each Month Spent in Bed.

FORTYTHREE, CAL., July 26.—When George Crittenden, an attorney, got out of the Caliente Hotel, he was injured in an automobile accident two months ago, he found that he had lost a inch in height. When he got home, he found that his height had increased to three inches, so he went to Berlin, accused of slandering the postoffice in the name of the Kaiser, who had held him in confinement for six months. The lawyer lost his patience after he had called his number three times in the course of three-quarters of an hour. The girl told him that "Ninety percent of the time when you call, the answer is 'No answer.'

Maybe it is a woman. The medical experts say that women are susceptible to such things, and as a wholly, determine when they succumb.

Diseases Develop in Germany.

The malady that was a scourge of society in Germany a few years ago is the most extraordinary because it is well known that the body goes through a normal life, living quite normally, and then suddenly taller in the morning than at night.

Let us consider the interest of Japan in Central America.

It is a reasonable certainty that Japan has not spread her cards on the table, but the pending conflict over the Canal will bring her into the picture.

Formerly, Japan wrested from China and tried to win from Russia the bleak plains of Manchuria; but there is nothing that Japan could want on the Asiatic coast to serve her purpose.

Woman Who Now Possesses Franchise Will Aid Movement in All Other States

WASHINGTON, July 26.—Plans for a broad-based campaign for votes for women in all other states are now being prepared by the Union of Women suffragists of New York, whose president, Mrs. Alice Paul, has asked the support of the National Committee of Woman Suffrage to help in the work.

The plan of the effort was made today at the congressional committee headquarters of the council.

Lightning Rips Shoe From Wearer's Foot

Man Escapes Physical Injury Save in Small Burn—Son Nearly Is Not Touched.

INVERNESS, July 26.—O. M. Simpson, a laborer, was knocked down and made unconscious for several moments in the afternoon yesterday when lightning struck him in the after noon. He lay unconscious on Verona, sitting a few inches away from his bed.

The lightning struck with sufficient force to incinerate Simpson's clothes, but the man escaped with only a slight burn of the skin of the electrical fire.

The whole system is rotten.

Investigation by the Interstate Commerce Commission is in other facts of the case of a man about the size of a dime on diamond of fire.

## FRANK FIGHTS FOR LIFE MONDAY Dorsey Ready to Avenge Mary Phagan Mystery of Months Is Still Unsolved

PRINCIPAL figures in Atlanta's most noted criminal case. Two pictures of Mary Phagan, the little factory girl, whose slaying has proved South's most baffling mystery, are shown, while below is Leo Frank, superintendent of the National Pencil Factory, where her body was found, who is accused of her murder, and about whose guilt or innocence brilliant legal battle will be fought.

MOST BITTER LEGAL BATTLE IN HISTORY OF ATLANTA COURTS IS EXPECTED--CASE WILL PROBABLY LAST FOR WEEKS.

AFTER three months of mystery in the death of Mary Phagan, a climax is at hand more tragic, more dramatic, more breathlessly interesting to Atlanta and all Georgia than any other of the trials of the last year. Leo M. Frank, accused of the little girl's tragic death, April 26, stirred a State, will be brought to trial Monday on the charge that he killed her.

Frank's trial is the crowning event of the hundred thrilling circumstances surrounding the tragedy. Whatever the outcome, regardless of his conviction or acquittal, the incidents that follow the trial will come as an anti-climax. The process will not almost all its chances for solving the mystery, for the case it has prepared against Frank, his heavy guns are trained against the factory superintendent. It

JERSEY CITY, N. J., July 26.—After partition, the young man who has been ordered extradited to Italy to stand trial for the murder of his wife, seems to be apparently unconcerned about the proceedings. He has said he would be willing to return to America again for Christmas. Although the United States Government has ordered him sent to Italy, he has recently had a visitor, Mr. Leo Mullins, his attorney, who told him that he would be allowed to return to America if he would make an engagement with next year Christmas at church.

WILMINGTON, N. J., July 26.—In the steel vault of the Mechanics' National Bank a robbery was committed early this morning. The burglar, who is described as a man of medium height among the bank clerks, contains the odds and ends of the bank's equipment, including a safe deposit box containing a large amount of money.

BURLINGTON, N. J., July 26.—In

the steel vault of the Mechanics' National Bank a robbery was committed early this morning. The burglar, who is described as a man of medium height among the bank clerks, contains the odds and ends of the bank's equipment, including a safe deposit box containing a large amount of money.

Within the folds of paper and ribbon is a pair of corsets, a woman's value \$2.25, on which a young negro, Jim Conley, was found to have been shot to death yesterday morning.

Colonists at Arden Now Going to 'Roost'

Sinclair's Followers Desert Homes on Ground for Bungalow Built in Tree Tops.

ARDEN, DEL., July 26.—Well, good night, folks; I'm going to 'roost.' That may be a community used sentence before long in the colony founded by Sinclair and his associates. Sleeping in the tree tops, monkeys and certain types of savages do, is the latest development of man's efforts to nature idea as applied to the colonists.

"It started when two of the colonists, using a lot of lumber bequeathed by Mr. Sinclair, who left, constructed an aerial bungalow four popular feet as corner posts.

## SLATONBOOM FOR SENATOR REVIVES OLD STATE FIGHT

Governor Keeps Silence While His Friends Sound Georgia, and the Hoke Smith Clan Prepares to Decide the Factional Struggle.

**Joe Brown and His Successor Will Undoubtedly Get Together on Program Before Announcement Is Made of Either's Candidacy.**

There is a well-defined, positive and aggressive movement on to nominate Governor John M. Slaton for Senator in next year's primary.

The Governor, it is not known to us, is a party to it, and the impression is that he is not, at least, directly.

Nevertheless, the Slaton senatorial boom is on, and it is supported by not only among members of the Legislature now in Atlanta and visiting statesmen, but throughout the State.

Governor Slaton certainly has said no public word that can be twisted or construed into the suggestion of his senatorial candidacy, and it probably is true that he has seen the matter from the most, if not all, thought thus far.

It is generally agreed that if elected the Senator Hoke Smith will be a candidate to succeed himself. He has served a portion of Senator Clay's unexpired term and has given his friends to understand that he will be in the August primary of next year.

Brown Name Discussed.

If there is to be a hotly contested senatorial campaign next year, therefore, it likely will open along about May 1.

Before Governor Brown retired from the Executive Office, his name frequently was discussed for the senatorial succession.

The wiser and more experienced observers of things political in Georgia predicted correctly that Governor Slaton and Senator Brown will not both be in the senatorial race, and that whichever announces, if either, it will be with a pretty thorough understanding of what the other is doing.

The dolefulness, therefore, are figuring a senatorial race next year with Senator Smith on one hand and Senator Brown or Governor Slaton on the other.

Which one it shall be probably will be thrashed out between this time and Aug. 1.

If Governor Slaton elects to have a try for the Senate next year, thereby giving up the Governorship at the expiration of a first term, it will mean that he will be a candidate for the executive succession, and already rumors are fixing that up also.

Both Factors Green.

In the event Governor Slaton announces for the Senate, it is said that Congressman Hardwick will be put in the race for Governor, and that the friends of Senator Smith, and that Congressmen Gordon L. Jones, President of the Senate, W. West will be his opponent, put forth by the Slaton and Brown people.

It is a well-known fact that the nationalized gubernatorial prospects reported more or less widely in have them set up in the race for Governor, and that Speaker Burwell and his supporters are for the Slaton. In the Legislature, their ears to the ground, Attorney General Thompson, State Auditor, etc., have thought to be not absolutely and altogether.

Old Foss Once More.

Of course, if the Slaton senatorial boom does not last a hour or two, and the Governor does not put a quietus upon it, why, then, the rather pretty and thrilling house of cards the political bigwigs have set up will probably drop down, and the senatorial race will resolve itself, perhaps, in the hands of the two principal enemies, Senator Hoke Smith and former Governor "Little Joe" Brown.

But, Fingers Crossed.

If that remains material, it will be hard to say for certain, but it would be to be sure, and in a way it would be

## PINKERTON MEN BRAND LANFORD CHARGES FALSE

Detectives Declare City Police and  
Dorsey Were Told All Evi-  
dence They Developed.

Emphatic denial is the general re-  
action of the detective force here  
that had kept bad faith with the city de-  
partment in connection with the Investi-  
gation of the murder of Mary Phagan.  
It was made by H. B. Pierce, super-  
intendent of Detectives, at Atlanta, Saturday night.

Chief Lanford's accusations against  
the Pinkerton official were mainly that  
he had lied to the police and to the city de-  
partment in connection with the investi-  
gation of the Phagan case.

SpeECHES were made by many of  
the citizens and by the Mayor, and  
the case finally left after being as-  
serted that the Cossacks would do their utmost to  
shore up the city. There was no work  
done by the Cossacks.

A call meeting of Council was held  
this week and a body of about  
80 representatives met, went before  
the city officials and called their atten-  
tion to the fact that the Cossacks were  
not being operated in the city limits,

that blind tigers are plentiful, that  
the city is "wide open" Sunday.

A committee also was asked for  
an investigation action.

Speeches were made by many of  
the citizens and by the Mayor, and

## BOTH MEXICO AND CENTRAL AMERICA ARE RIPE FOR JAP CONQUEST

Frederick Upham Adams. Shows  
Why This Country May Have to  
Repel Yellow Invader Seaking a  
New Empire at Its Very Doors.

"War or Humiliation Confronts  
U. S., as Result of Applying the  
Monroe Doctrine as Threat and  
Not as Firmly Enforced Policy."

"Others Will Take Up Task We  
Decline—We Are Responsible  
for the Lamentable Condition of  
Affairs To-day in Mexico."

By FREDERICK UPHAM ADAMS.

"The time is coming when the  
United States will be forced to  
face the fact that Japanese sail in  
North America."

In varying forms this startling  
prediction was repeatedly made to me  
during a recent protracted tour of  
the Americas, and it was first uttered, practically as above  
quoted, by President Francisco I. Madero  
in the course of a long interview  
with the author at the castle of Chapultepec.

This prediction was repeated to me  
by a President of Central America, who  
he has thus far escaped assassination  
or overthrow by revolution. It was  
also uttered by a Mexican, whose  
reputation and keen judgment, who  
had been a student of Latin American  
affairs for many years, a member of  
the diplomatic corps.

The ignorance of some Americans  
concerning Mexico and Central America,  
coupled with the lamentable condition  
which has marked their diplomatic  
intercourse with them, constitutes a  
menace of dire portent.

The Danger Zone.

As a result of years of diplomatic  
neglect we have made the great  
section a dangerous zone. We have  
created at our very doors conditions  
which promise war with any of the  
great commercial nations, if not  
expected it will be speedily adored,

and it will be a task for the  
diplomatic corps to avert a  
war or humiliation.

These conditions are the direct  
result of the shortsighted, shortsighted  
and firmly enforced policy. And what is  
the fruit now ripening? The certainty  
that other nations will take up  
the cause with us in heralding that  
will mean war or humiliation.

Let us consider the interest of Japan  
in this matter.

Japan and Central America.

It is a well-known fact that Japan  
has not spread her cords on  
the table in the pending controversy  
over the California anti-silver legis-  
lation, and recent reports indicate  
which affect Central America.

These conditions are the direct  
result of the shortsighted, shortsighted  
and firmly enforced policy. And what is  
the fruit now ripening? The certainty  
that other nations will take up  
the cause with us in heralding that  
will mean war or humiliation.

Let us consider the interest of Japan  
in this matter.

Japan and Central America.

It is a well-known fact that Japan  
has not spread her cords on  
the table in the pending controversy  
over the California anti-silver legis-  
lation, and recent reports indicate  
which affect Central America.

These conditions are the direct  
result of the shortsighted, shortsighted  
and firmly enforced policy. And what is  
the fruit now ripening? The certainty  
that other nations will take up  
the cause with us in heralding that  
will mean war or humiliation.

Like Home to Japan.

For years the Japanese have  
been a scourge to the world.

They are now bent on the east.

Their eyes are set on California or

any part of the United States.

But we Mexican and Central  
American friends of ours are not  
so weak as our Monroe Doctrine.

Like Home to Japan.

For years the Japanese have  
been a scourge to the world.

John Early, Noted  
As Leper, Is Insane  
Man Who Guarded Colony Is Himself  
Put In Cell, Raving  
Mad.

SEATTLE, July 26.—John Early, who  
was called in Washington a few years  
ago a leper, and who more recently was  
placed at the Federal leper colony in  
Mazama, Pe Ell, N. W., is himself under guard  
at the colony.

Early has been under guard for  
several months, officials at the station  
say. By the District Health Officer, he was  
isolated in a camp on the lowlands of  
the Pacific branch. After a long fight  
with his doctor, he was admitted to the  
Penitentiary Office for an assurance  
as a veteran of the Spanish-American  
war, and to prevent him from escaping  
to the coast.

to the coast.

Golfers Go 35 Miles  
In Just 1,087 Strokes

Experts Play From Maidstone to Lit-  
tleton on the Sea  
on a Wager.

Special Cable to The American.

Now comes about a well-known  
offer to bet Nevile Foster, of  
the Ashdown Forest Golf Club, and  
W. W. Warman, of the New Forest  
Golf Club, that they could not play  
over the woodland heath and hills  
a distance of eight miles, in 350  
strokes. The bet was taken and the  
task accomplished in 384 strokes.

Waiters Back of Bill  
To Prevent 'Tipping'

Measure Provides Fine for Both  
Tipper and Recipient of Bounty,  
Reward for Informer.

ST. LOUIS, July 26.—An ordinance  
to end "tipping" has been passed by  
the House of Delegates, where it is  
expected it will be speedily adopted,  
and will become a law.

This ordinance has had the back-  
ing of the waiters' union, which  
will not strike in any of the principal  
hotels and restaurants. The bill pro-  
vides a fine of \$10 to \$50 for each offense,  
both the "tipper" and re-  
cipient of the "tip" being subject to  
the same, and the informer to double  
the fine.

A girl on the Ivy exchange was  
asked yesterday whether she thought  
of the scientific discovery of the  
discovery.

"Huh," she snorted—if a pretty girl  
can snort—"are the wise ones just  
finding that out? Why we know all  
about it now. I don't care if it's  
true. It comes over the sufferer,  
causing him to see red and to talk  
blue, when he calls once, twice, then  
three times, and finds such time that  
he can't get no rest in his bed."

And this voice went up and out with  
a shrill.

The little laugh is just as was  
repeated by a pretty girl who has  
been ordered to Italy to stand trial  
for the murder of his wife, seems to be apparently uncon-  
cerned about the outcome of the trial.  
She is known as Lillian Glyn.

## BOTH MEXICO AND CENTRAL AMERICA ARE RIPE FOR JAP CONQUEST'

Frederick Upham Adams Shows  
Why This Country May Have to  
Appeal Yellow Invasion to a  
New Empire at Its Very Doors.

"War or Humiliation Confronts  
U. S. as Result of Applying the  
Monroe Doctrine as Threat and  
Not as Firmly Enforced Policy."

"Others Will Take Up Task We  
Decline—We Are Responsible  
for the Lamentable Condition of  
Affairs To-day in Mexico."

By FREDERICK UPHAM ADAMS.

"The time is coming when the  
United States will be forced to  
fight Japan on Japanese soil in  
North America."

In varying phases the startling  
proposition was presented to me  
during a recent protracted tour  
of Mexico and Central America.

This prediction was repeated to me  
by a friend of a Central American  
representative who, in his opinion,  
he has thus far secured assassination  
or overthrow by revolution. It was  
also voiced by an American, of high  
repute, who is kept journeying  
about the study of Latin American  
affairs for more than a generation.

U. S. Diplomacy Scored.

The ignorance and indifference  
of the American public to the  
affairs of Mexico and Central Amer-

ica, and the lack of interest in  
the welfare of the people, is  
a definite factor in the making of  
the chronic conditions of military  
despotism and recurrent revolutions  
which have plagued the continent.

These conditions are the direct  
result of applying the Monroe Doctrine  
as a threat and not as "just and  
firmly enforced policy." And what is  
more important, they are the result  
of some other nation's will to take  
on the task which we decline. That will  
mean war or humiliation.

Let us consider the interest of Ja-

pan in this matter.

Japan and Central America,

As a result of years of diplomatic  
imbecility we have made of this great  
section a danger zone.

We have created world conditions  
which are the bane of the nations of the  
great commercial nations, who are  
count as friends, or the alternative of  
condemning a Monroe Doctrine.

We have created international  
conflict of interests in Mexico and  
Central America, coupled with  
the ignorance and stupidity which

has marked our diplomatic in-

tercourse with them, constitute a

grave danger zone.

John Early, Noted  
As Lepper, Is Insane

Man Who Guarded Colony Is Himself  
Put In Coll. Raving  
Mad.

SEATTLE, July 26.—John Early, who  
was a leper and who more recently was  
placed at the Federal leper colony at  
Diamond Lake Station, has another  
mind and is himself under guard at the  
colony.

Early has been a patient for several  
months, officials at the colony believe.  
Hearing his mind was not right, he became  
wild and raving, and locked up to protect  
himself and the unfortunate at the  
colony.

John Early was first admitted a leper  
by the District Hospital, and was  
isolated in a camp on the lowlands of  
the Pacific Coast. After a long fight  
with the local authorities and with the  
Panama Office for admission, he became  
a veteran of the Spanish-American  
war, having fought in the most uncom-  
municative way to New York.

Golfers Go 35 Miles  
In Just 1,087 Strokes

Experiments Play From Maidstone to Lit-  
tleton on the Sea  
on a Wager.

LONG BEACH, Calif., July 26.—To cover  
35 miles in 1,087 strokes is a fact that  
two golfers accomplished in playing  
from Maidstone to Littleton-on-the-Sea.

The two men who could not play  
from Maidstone to Littleton-on-the-Sea

How this came about is a well-known  
golfer offered to let Neville Postle  
of the Ashdown Forest Golf Club, and  
Wartman of the Newton Green  
Golf Club, have a go at it.

"The ninth time I've rung  
them," he raved on. "You tell 'em  
they're busy, and I know they ain't.  
They don't get no right to be busy."

And his voice went up and out with  
a shrirk.

"The little incident is just as was  
recorded by a pretty switchboard oper-  
ator in an Atlantic exchange.

The little incident was not a brute. He  
was merely a victim of Dementia Tel-  
ephonica.

Yes, there is such a disease, and  
those who are actually susceptible  
to its visitation are to be found in  
the American Medical Association.

Recent numbers discuss the new dis-  
ease and accept its sympathy on a  
certain vector, whose case is men-  
tioned and analyzed.

"We're Number One, Cause."

The telephone dementia, it seems,  
usually attacks victims about the  
fourth or fifth time, because it is  
noted that a number is busy, and then finds  
out that it was nothing of the kind.

Then comes the call over the sufferer,  
causing him to scratch twice, then  
three times, and finds each time that  
the little "hello" girl has given

him the same reply.

The girls in the Atlanta exchange  
say they understand now, and do not  
pay any attention to it. They then do  
not say anything to it. They then do  
not say anything to it.

A girl on the Ivy exchange was  
asked yesterday just what she thought  
of the scientific discovery of the disease.

"Huh," she snorted—"I pretty girl  
can smart"—are the wise ones just  
finding that out? Why, we know all  
the time that there was something  
there, but we didn't know how  
to call it. Then best remember  
when they pull out the plug and let them talk to  
us, and to ourselves, our poor fellow. Or maybe it's  
a woman."

Maybe it is a woman. The medical  
men say the persons are susceptible  
as we are men, and are visibly de-  
mentic when they are.

Diseases Develop in Germany.

The many first was noted scien-  
tifically when a lawyer and a  
trial in Berlin, and of whom  
the postoffice, which also controls  
the telephone in the land of the  
Kaiser, of government ownership.

The lawyer, in his patagonia, had  
called his number three times in  
the course of three-quarters of an  
hour. The girl told him that "Num-  
ber Under One" was busy. Later he  
found that it hadn't been, and he ex-  
plained.

The medical expert of the court be-  
lieved that the girl was taken less  
than a week ago, and that she was  
highly nervous temperament, and that  
she had heard of going insane  
from telephone vexation. And to  
the physician became a subject  
of research, and was put in the doc-  
tor's books.

PORTERVILLE, Calif., July 26.—George  
Cottenden, an attorney, got out of  
bed to do for the first time since  
he was injured in an automobile ac-  
cident, and found that he had lost  
3 inches in height. This was  
the moment when his recovery was  
well known that the human body grows  
length while lying prone. A man is  
now over 6 feet in the morning at  
night.

The certainty that some other nation will take  
on the task which we decline. That will  
mean war or humiliation.

Let us consider the interest of Ja-

pan in this matter.

Not Touched.

DETROIT, July 28.—O. Simpson, a  
lawyer, who is the present agent in  
unconsciousness for several minutes when  
driven in a lighted car, but in the after-  
noon his teeth are away with his hair.

The lighted strike, according  
to the lawyer, struck the unconscious  
man, who was driving his car to the  
station of the state legislature, and  
the driver of the car, who was driving  
his car to the station of the state legislature.

## 'BOTH MEXICO AND CENTRAL AMERICA ARE RIPE FOR JAP CONQUEST'

Frederick Upham Adams Shows Why This Country May Have to Repel Yellow Invader Seeking a New Empire at Its Very Doors.

"War or Humiliation Confronts U. S. as Result of Applying the Monroe Doctrine as Threat and Not as Firmly Enforced Policy."

"Officers Will Take Up Task We Decline—We Argue Responsibly for the Lamentable Condition of Affairs. To-day in Mexico."

By FREDERICK UPHAM ADAMS.

"The time is coming when the United States will be forced to fight Japan in Central America."

In varying phrase this startling prediction was repeatedly made to me during a recent practical visit to the Central American Republics. It was first uttered, practically as above quoted, by President Francisco I. Madero in the course of a long interview with the author of this column.

This prediction was repeated to me by a President of a Central American republic who shall be named, since he has thus far escaped assassination. It was also uttered by an American of high reputation and keen judgment, who has been a student of Latin American affairs for more than a quarter of a century.

*Diplomatic Secrecy.*

The ignorance and indifference of the Americans people concerning Mexico and Central America, coupled with the ignorance and apathy which has marked our diplomatic intercourse with them, constitute a menace of dire portent.

*The Danger Zone.*

As a result of years of diplomatic maneuvering we have made of this great section a dangerous zone. We have created at our very doors conditions which promote war with any of the great powers. And we have no alternative, outside of abandoning a Monroe Doctrine.

We are responsible for the lamentable condition of affairs in Mexico, for the recent pronouncements of the Central American and recurrent revolutions which afflict Central America.

These conditions are the direct result of the policy of the two Pacific Powers as a threat and not as a just and firmly enforced policy. And what is the fault now ripening? The terrible fact that some other power will take up the task which we decline. That will mean war or humiliation.

Let us consider the interest of Japan in this matter.

*Japan and Central America.*

In a number of years certain that Japan has not spread her cords on the table in the pending controversy over the Central American Republics may be so assured that its people will be permitted unrestricted immigration to the United States and the rights of naturalization will be given to all Japanese not within the borders of our National Councils to control or change the alien-and-lands of "any State."

They are who claim of Japan all this and more, but they have some concrete motive in demanding something which they know will not be granted. What Japan demands and will fight for is an outlet for her huge population.

To her land-hunger Japan created "Formosa from a desert" and "Manchuria from the bleak plains of Manchuria; there to nothing, that Japan really wants, is the Asiatic continent."

Her eyes are turned to the east. They are fixed, not on California or any part or part of the United States, but on Manchuria and the vast, vast world of the Far Eastern Hemisphere. Like home to Japan.

For years the Japanese have

John Early, Noted As Leper, Is Insane

Man Who Guarded Colony Is Himself But in Cell, Raving Mad.

SEATTLE, July 26.—John Early, who was a leper and who more recently was a guard at the Federal leper colony at Diamond Point Station, has lost his mind and is himself under guard at the colony.

He has been under watch for several months, officials at the station being told his mind was right. Some time ago he was found to be violent and was locked up to protect himself and the others at the colony.

Early was first admitted a leper by the District Health Officer, he was isolated in a camp on the islands of Puget Sound, and later was sent to the colony with the local authorities and another with the Pension Office for an allowance to live. In the early days of the war, he was permitted to slip unobserved away to New York.

Golfers Go 35 Miles In Just 1,087 Strokes

Explos Play From Maidstone to Littleton on the Sea on a Wager.

LONDON, July 26.—To cover 35 miles in 1,087 strokes is a feat that two golfers accomplished in playing from Maidstone to Littleton-on-the-Sea.

How this came about is a well-known golfers' offering to bet Neville Foster, of the Ashdown Forest Golf Club, and W. W. Warden, of the New Forest Golf Club, that they could play from Maidstone to Littleton-on-the-Sea in less than 1,100 strokes.

The little incident is just as was expected it was a pretty wristboard operator in an Atlanta exchange. The man in question was not a business man, but was evidently a victim of Dementia Telephonica.

This is such a disease, and business men are acutely susceptible, it is often called "the millionaires disease." The American Medical Association in a recent number discusses the new disease and points out its sympathy on a certain class of people case is mentioned and analyzed.

Wrong Number One Cause.

The telephone demented, it seems, usually seizes on the wrong number. At one time he has been told that it was nothing of the kind.

It is not, "You're busy," and I am talking to you again.

And his voice went up and out with a shrillness.

## COURT IN READINESS FOR FRANK TRIAL OPENING

Factory Superintendent To Be Placed on Trial for Girl's Slaying Monday Morning—Both Sides Confident of Winning a Victory.

Continued From Page 1.

defending Frank. They already recall the idea of accepting the defense of Conley, but in view of the many changes he has made in it since he first talked to the detectives, they brand him as a perjured and his state-mug.

**Witnesses Ready for Fight.**

Solicitor Dorsey and his associates in the prosecution, Frank A. Hooper, have been working hard to prove the fact that may be presented at any moment after the opening of the trial that may be issued by the State which have been issued by Luther Z. Rosser and Reuben R. Arnold, law.

The subpoenas, which were issued last week, will be shown to the jury if the trial might begin July 28, commanded Solicitor Dorsey, Chief Lawyer, and other detectives who had worked on the Phagan mystery to bring to court with them the men who had been in the room when Lee M. Frank was arrested.

The attorneys for the prosecution branded the subpoenas as a trick to distract the jury from the real testimony which would vary in the slight from what was given in the affidavit. They announced that Conley would fight the murder before the bar of the court, and that he would regard as not unlikely that they would relate with subpoena duces tecum to the trial the names of persons that the skirmish over the subpoena might also involve a large number of legal jockeying.

Judge Brewster, one of the oldest members of the Atlanta bar, and the man who has been called in legal information, said he could not tell what the prosecution is preparing certain plans.

**Colonel Brewster to Figure.**

Colonel Brewster has compiled his notes on the Phagan case and every particle of evidence which the prosecution has in its possession, and he is expected to be an interesting

figure in the courtroom during the progress of the trial.

Attorneys yesterday that they have of late been working on behalf of Conley for a continuance when the case against him was to be heard in the trial court, charged with the murder of Mary Phagan, the possibility of a mistake having been made is very remote.

**To say why the State believes Frank to be guilty of this murder would be hurtful, and lay before the defense, the evidence we have so carefully guarded.**

We have employed only the fairest methods and have accepted no evidence until it had been subjected to the acid test.

Conley's connection with the case occasioned the most careful investigation. No statement of his was accepted until it had been proved. He is merely a link in the chain.

We looked into the possibility of Conley having committed the murder, but with other facts considered, it was impossible to connect him other than as an accessory.

Whether there can be a reasonable doubt when the evidence is weighed remains to be seen, but on the eve of the trial I have no misgiving as to the strength of the State's case.

## Public Demands Frank Trial To-morrow Old Police Reporter Sees No Cause for Delay

Either Side Asking Postponement  
Will Reveal Weakness; as Time  
Has Been Given for Preparation.  
Conley is Center of Interest.

By AN OLD POLICE REPORTER:

The defense in the case of Leo Frank would have made a mistake, if it had not been compelled to do something for anything, had it not been compelled to ask for a continuance of the case to-morrow.

Indeed, the fact that the defense moved the date of an intent to move for a continuance, if it had not been compelled to do so, would not have been on the other hand, of much particularity to prejudice the case.

The people want the Frank case tried as soon as possible, and to move about that.

It was my opinion that it might be postponed, with the consent of the defense, even if not of the State, until Frank, being more or less inclined to do so, would be ready.

What is the reason for the demand for a continuance? Is it to delay?

If the defense is sure of itself, why, then, it must be because the one thing that it wants is a weak case. Thus reasons the public.

Frank is not in directory.

The case against him can, however, be easily disposed of in a few days. Frank is reported eager for trial. The State professes to be all ready.

Hesitancy upon the part of either side is not in favor to the hastening.

Public Not Muddled.

While the State is anxious of Jim Conley's fate, and an effort was made to keep the negro from the advance of Frank's trial, the public has not permitted itself to be muddled.

It realizes that Conley occupies a prominent place in the community, and that the finger of suspicion points him as a possible murderer, but it does not believe that Phagan, no less than as a confessed criminal, was guilty.

The public has its eye very wide open, and is watching, along.

Frank is reported eager for trial.

He is not in directory.
